SKILLS

Programming Languages: Java, JavaScript, Python, SQL
Frontend Technologies: React.js, HTML5, CSS3
Backend Technologies: Node.js, Express.js, RESTful APIs, Authentication, Authorization, JWT
Databases & Storage: MySQL, MongoDB, Relational Database Design
Developer Tools: Git, GitHub, VS Code, Postman
Core Concepts: Client-Server Architecture, API Design, CRUD Operations, Error Handling

EDUCATION

Bachelor of Technology in Computer Science and Engineering Vellore Institute of Technology, Bhopal CGPA: 7.59/10.00	2022 – 2026
Class XII (Senior Secondary) The Oxford High Secondary School, Sehore Percentage: 84.0%	2021
Class X (Secondary) The Oxford High Secondary School, Sehore Percentage: 84.2%	2019

PROJECTS & TECHNICAL EXPERIENCE

Personal Expense Tracker App

Tech Stack: React.js, Node.js, Express.js, MySQL, JWT

- Developed a full-stack expense tracking application enabling users to log, categorize, and manage daily expenses using CRUD operations.
- Implemented JWT-based authentication to securely manage **500+ simulated user sessions** and protect financial data.
- Built interactive dashboards displaying **monthly summaries, category-wise breakdowns, and total spending insights**.
- Optimized backend database queries to deliver analytics responses in **under 200ms average latency**.

URL Shortener & Analytics Platform

Tech Stack: Node.js, Express.js, MySQL, React.js

- Engineered a scalable URL shortening service handling URL generation, redirection, and analytics logging with RESTful APIs.
- Designed collision-resistant short code generation and HTTP 301/302 redirection flows, supporting **1,000+ test URLs**.
- Implemented indexed SQL schemas and aggregation queries to process **10,000+ click events** with **<150ms average query latency**.
- Built analytics endpoints for per-URL click counts and time-based trends, enabling efficient traffic analysis.
- Enforced input validation and centralized error handling to maintain consistent API responses and system reliability.

Messenger 2 — Real-Time Chat Application

Tech Stack: React.js, Node.js, Express.js, MongoDB, Socket.io

- Developed a real-time messaging system using WebSockets (Socket.io) supporting **500+ concurrent test connections**.
- Implemented JWT-based authentication and session management to securely handle multi-user chat interactions.
- Designed event-driven message flows to achieve **under 200ms message delivery latency** under simulated load.
- Optimized client-server synchronization and message broadcasting logic to reduce unnecessary network traffic by **30%**.

CERTIFICATIONS

- Full Stack Developer (MERN) — SmartBridge, 2025
- Generative AI Fundamentals — IBM, 2025
